

## 2018 Ram 1500/2500/3500 Security Bypass Install

All 2018 FCA vehicles are built with an SGW Security Gateway Module that prevents access to the vehicle from the OBD2 port by anything but the dealer diagnostic tools.

- 2018 Ram 1500-3500

### Installation

**Step 1: Remove the 2 screws under the top rubber mat above the radio**

**Step 2: Remove the 1 screw behind the rubber mat in the cubby above the 110v outlet if equipped**

**Step 3: Gently Pull from the edges the radio bezel away from the instrument panel.**

**Step 4: Remove the four fasteners securing the Radio to the instrument panel**

**Step 5: Remove the radio from the instrument panel.**

**Step 6: Remove the 3 bolts holding the Security Gateway bracket to the instrument panel**

**Step 7: Unplug connectors going into Security Gateway Module (1)**

**Step 8: Plug in Security Bypass Block into Existing Connectors and tuck up inside.**

**Step 9: Reinstall Radio and Dash Bezel.**

**DISCLAIMER:**

**Bypass DOES need to be removed prior to bringing vehicle into service or else dealer tools will not work.**
